(An Exploration Stage Company)

Consolidated Financial Statements

For the Years Ended November 30, 2014 and 2013

Expressed in Canadian Dollars

INDEPENDENT AUDITORS' REPORT

To the Shareholders of Precipitate Gold Corp.

We have audited the accompanying consolidated financial statements of Precipitate Gold Corp., which comprise the consolidated statements of financial position as at November 30, 2014 and 2013, and the consolidated statements of loss and comprehensive loss, changes in equity, cash flows, schedule of mineral property acquisition costs and schedules of mineral property exploration and evaluation expenditures for the years then ended, and a summary of significant accounting policies and other explanatory information.

Management's Responsibility for the Consolidated Financial Statements

Management is responsible for the preparation and fair presentation of these consolidated financial statements in accordance with International Financial Reporting Standards, and for such internal control as management determines is necessary to enable the preparation of consolidated financial statements that are free from material misstatement, whether due to fraud or error.

Auditors' Responsibility

Our responsibility is to express an opinion on these consolidated financial statements based on our audits. We conducted our audits in accordance with Canadian generally accepted auditing standards. Those standards require that we comply with ethical requirements and plan and perform the audit to obtain reasonable assurance about whether the consolidated financial statements are free from material misstatement.

An audit involves performing procedures to obtain audit evidence about the amounts and disclosures in the consolidated financial statements. The procedures selected depend on the auditors' judgment, including the assessment of the risks of material misstatement of the consolidated financial statements, whether due to fraud or error. In making those risk assessments, the auditor considers internal control relevant to the entity's preparation and fair presentation of the consolidated financial statements in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the entity's internal control. An audit also includes evaluating the appropriateness of accounting policies used and the reasonableness of accounting estimates made by management, as well as evaluating the overall presentation of the consolidated financial statements.

We believe that the audit evidence we have obtained in our audits is sufficient and appropriate to provide a basis for our audit opinion.

Opinion

In our opinion, these consolidated financial statements present fairly, in all material respects, the financial position of Precipitate Gold Corp. as at November 30, 2014 and 2013 and its financial performance and its cash flows for the years then ended in accordance with International Financial Reporting Standards.

Emphasis of Matter

Without qualifying our opinion, we draw attention to Note 1 in the consolidated financial statements which describes conditions and matters that indicate the existence of a material uncertainty that may cast significant doubt about Precipitate Gold Corp.'s ability to continue as a going concern.

Notes to the Consolidated Financial Statements For the Years Ended November 30, 2014 and 2013

In Canadian Dollars

1. Nature of Operations and Going Concern

Precipitate Gold Corp. (the "Company") was incorporated on January 31, 2011, under the laws of the province of British Columbia, Canada, and its principal activity is the acquisition and exploration of mineral properties in Canada and the Dominican Republic. The head office, principal address, and records office of the Company are located at 789 West Pender Street, Suite 800, Vancouver, British Columbia, V6C 1H2, Canada.

The recoverability of amounts shown as mineral properties is dependent upon the discovery of economically recoverable reserves, the Company's ability to obtain financing to develop the properties and the ultimate realization of profits through future production or sale of the properties. Realized values may be substantially different than carrying values as recorded in these financial statements.

These consolidated financial statements have been prepared on a going concern basis which assumes that the Company will be able to continue its operation as a going concern for the foreseeable future and will be able to realize its assets and discharge its liabilities in the normal course of business. At November 30, 2014, the Company had not achieved profitable operations, had an accumulated deficit of \$5,364,177 since inception and expects to incur further losses in the development of its business. These material uncertainties may cast significant doubt about the Company's ability to continue as a going concern. These consolidated financial statements do not give effect to adjustments that would be necessary to the carrying values and classification of assets and liabilities should the Company be unable to continue as a going concern.

Although the Company has been successful in the past in obtaining financing, there can be no assurances that the Company will continue to obtain the additional financial resources necessary and/or achieve profitability or positive cash flows from its future operations. If the Company is unable to obtain adequate additional financing, the Company would be required to curtail its planned operations, exploration and development activities.

2. Basis of Presentation

a) Statement of Compliance

These consolidated financial statements have been prepared in accordance with the International Financial Reporting Standards ("IFRS") as issued by the International Accounting Standards Board ("IASB").

These consolidated financial statements have been prepared on a historical cost basis except for financial instruments classified as available-for-sale and financial assets at fair value through profit and loss, which are stated at their fair values. In addition, these financial statements have been prepared using the accrual basis of accounting. Certain comparative information has been reclassified to conform with current year presentation.

The accounting policies set out in Note 3 have been applied consistently by the Company during the years presented.

Notes to the Consolidated Financial Statements For the Years Ended November 30, 2014 and 2013

In Canadian Dollars

2. Basis of Presentation - Continued

b) Approval of the Financial Statements

These consolidated financial statements were approved and authorized for issue by the Board of Directors on March 18, 2015.

c) Basis of Consolidation

These consolidated financial statements include the financial statements of the Company and its four wholly-owned subsidiaries: 1) 0945044 BC Ltd., incorporated in British Columbia, Canada, which owns 100% of Corporacion Minera San Juan, S.R.L. located in the Dominican Republic; 2) Minera Pendiente S.A. de C.V., incorporated and located in Mexico; and 3) Precipitate Gold (USA) Corp. incorporated and located in the United States.

d) Functional and Presentation Currency

The functional currency of a company is the currency of the primary economic environment in which the company operates. The presentation currency for a company is the currency in which the company chooses to present its financial statements.

These consolidated financial statements are presented in Canadian dollars, which is the Company's presentation and functional currency. The functional currencies of the Company's subsidiaries do not differ from that of the parent company.

Transactions in foreign currencies are translated into the functional currency at exchange rates as at the date of the transaction. Foreign currency differences arising on translation are recognized in profit or loss. Foreign currency monetary assets and liabilities are translated at the functional currency exchange rate at the date of the statement of financial position. Non-monetary items that are measured in terms of historical cost in a foreign currency are translated using exchange rates as at the date of the initial transaction. Non-monetary items measured at fair value in a foreign currency are translated using the exchange rates as at the date of acquisition. All gains and losses on translation of these foreign currency transactions are included in profit or loss.

3. Significant Accounting Policies

a) Cash

Cash consist of amounts held in banks and demand deposits.

Notes to the Consolidated Financial Statements For the Years Ended November 30, 2014 and 2013

In Canadian Dollars

3. Significant Accounting Policies - Continued

b) Mineral Properties

i) Exploration and Evaluation

Property option payments, common shares issued, and other costs associated with acquiring the legal rights to explore a specific resource property are capitalized as mineral property interests and classified as intangible exploration and evaluation assets, whereas exploration and evaluation expenditures are recognized as expenses as they are incurred during the period. Exploration and evaluation expenditures include costs of assaying, community development, consumables and supplies, drilling, geological consulting, scoping and feasibility study, site administration and other costs to maintain legal rights to explore an area.

ii) Development

Upon completion of a technical feasibility study and when commercial viability is demonstrated, capitalized exploration and evaluation assets are transferred to and classified as mineral property acquisition and development costs. Costs associated with the commissioning of new assets incurred in the period before they are operating in the way intended by management, are capitalized. Development costs are net of the proceeds of the sale of metals from ore extracted during the development phase. Interest on borrowings related to the construction and development of assets are capitalized until substantially all the activities required to make the asset ready for its intended use are complete.

Mineral property interests are derecognized upon disposal or when no future economic benefits are expected. Gains and losses on disposal are determined by comparing the proceeds from disposal with the carrying amount of the item and are recognized in profit or loss.

iii) Impairment

The carrying value of all categories of mineral property are reviewed at least annually by management for indicators that the recoverable amount may be less than the carrying value. When indicators of impairment are present, the recoverable amount of an asset is evaluated at the level of a cash generating unit (CGU), the smallest identifiable group of assets that generates cash inflows that are largely independent of the cash inflows from other assets or groups of assets, where the recoverable amount of a CGU is the greater of the CGU's fair value less costs to sell and its value in use. An impairment loss is recognized in profit or loss to the extent the carrying amount exceeds the recoverable amount.

Notes to the Consolidated Financial Statements For the Years Ended November 30, 2014 and 2013

In Canadian Dollars

3. Significant Accounting Policies – Continued

b) Mineral Properties - Continued

iii) Impairment - Continued

Value-in-use is based on estimates of discounted future cash flows expected to be recovered from an asset or CGU through their use. Estimated future cash flows are calculated using estimates of future recoverable reserves and resources, future commodity prices and expected future operating and capital costs. Once calculated, the estimated future cash flows are discounted to their present value using a pre-tax discount rate that reflects current market assessments of the time value of money and the risks specific to the asset.

Fair value less costs to sell is the amount obtainable from either quotes from an active market or the sale of an asset or CGU in an arm's length transaction between knowledgeable and willing parties, less the costs of disposal. Costs of disposal are incremental costs directly attributable to the disposal of an asset or CGU, excluding finance costs and income tax expense.

Impairment losses recognized in respect of CGUs are allocated to reduce the carrying amounts of the other assets in the unit or group of units on a pro rata basis. Assumptions, such as commodity prices, discount rate, and expenditures, underlying the fair value estimates are subject to risks uncertainties. Impairment charges are recorded in the reporting period in which determination of impairment is made by management.

Impairment losses recognized in prior periods are assessed at each reporting date for any indications that the loss has decreased or no longer exists. An impairment loss is reversed if there has been a change in the estimates used to determine the recoverable amount. An impairment loss is reversed only to the extent that the asset's carrying amount does not exceed the carrying amount that would have been determined, net of depletion or amortization, if no impairment loss had been recognized.

c) Provisions

Provisions are recorded when a present legal or constructive obligation exists as a result of past events where it is probable that an outflow of resources embodying economic benefits will be required to settle the obligation and a reliable estimate of the amount of the obligation can be made.

The amount recognized as a provision is the best estimate of the consideration required to settle the present obligation at the statement of financial position date, taking into account the risks and uncertainties surrounding the obligation. Where a provision is measured using the cash flows estimated to settle the present obligation, its carrying amount is the present value of those cash flows. The increase in the obligation due to the passage of time is recognized as finance expense.

Notes to the Consolidated Financial Statements For the Years Ended November 30, 2014 and 2013

In Canadian Dollars

3. Significant Accounting Policies - Continued

d) Site Closure and Reclamation Provision

The Company recognizes a provision for statutory, contractual, constructive or legal obligations associated with decommissioning of mining operations and reclamation and rehabilitation costs arising when environmental disturbance is caused by the exploration or development of mineral properties, plant and equipment. Provisions for site closure and reclamation are recognized in the period in which the obligation is incurred or acquired, and are measured based on expected future cash flows to settle the obligation, discounted to their present value. The discount rate is a pre-tax rate that reflects current market assessments of the time value of money and risks specific to the liability.

When an obligation is initially recognized, the corresponding cost is capitalized to the carrying amount of the related asset in mineral properties, plant and equipment. These costs are depreciated on a basis consistent with depreciation, depletion, and amortization of the underlying assets.

e) Income Taxes

Provision for income taxes consists of current and deferred tax expense. Income tax expense is recognized in profit or loss except to the extent that it relates to items recognized either in other comprehensive income or directly in equity, in which case it is recognized in other comprehensive income or in equity, respectively. Current tax expense is the expected tax payable on the taxable income for the year, using tax rates enacted or substantively enacted at period end, adjusted for amendments to tax payable with regards to previous years. Taxes on income in the interim periods are accrued using the tax rate that would be applicable to expected total annual earnings.

Deferred tax is recognized in respect of temporary differences between the carrying amounts of assets and liabilities for financial reporting purposes and the amounts used for taxation purposes. Deferred tax is not recognized for temporary differences associated with the initial recognition of assets or liabilities in a transaction that is not a business combination and that affects neither accounting nor taxable income or loss and temporary differences relating to investments in subsidiaries to the extent that it is probable that they will not reverse in the foreseeable future. Deferred tax is measured at the tax rates that are expected to be applied to temporary differences when they reverse based on the laws that have been enacted or substantively enacted at the reporting date.

A deferred tax asset is recognized to the extent that it is probable that future taxable profits will be available against which the temporary difference can be utilized. Deferred tax assets are reviewed at each reporting date and are reduced to the extent that it is no longer probable that the related tax benefit will be realized.

Notes to the Consolidated Financial Statements For the Years Ended November 30, 2014 and 2013

In Canadian Dollars

3. Significant Accounting Policies – Continued

f) Share Capital

- i) The proceeds from the exercise of stock options, common share purchase warrants and purchase of common shares are recorded as share capital in the amount for which the option, warrant or share enabled the holder to purchase a common share in the Company.
- ii) Share capital issued for non-monetary consideration is recorded at an amount based on fair value of these common shares.
- iii) The proceeds from the issue of units is allocated between common shares and common share purchase warrants on a prorated basis using relative fair values of common shares and warrants. The fair value of common share purchase warrants is determined using the Black-Scholes option pricing model.
- (iv) The Company may from time to time, issue flow-through common shares to finance a significant portion of its exploration program. Pursuant to the terms of the flowthrough share agreements, these shares transfer the tax deductibility of qualifying resource expenditures to investors. On issuance, the Company separates the flowthrough common share into i) a flow-through common share premium, equal to the estimated premium, if any, investors pay for the flow-through feature, which is recognized as a liability and; ii) share capital. When the resource property expenditures are incurred, the Company derecognizes the liability and recognizes a deferred tax recovery.

All costs related to issuances of share capital are charged against the proceeds received from the related share capital.

g) Loss per Share

Basic loss per share is calculated using the weighted average number of common shares issued and outstanding during the period. Diluted loss per share is calculated by adjusting the weighted average number of common shares outstanding by an amount that assumes that the proceeds to be received on the exercise of dilutive stock options and warrants are applied to repurchase common shares at the average market price for the period in calculating the net dilution impact. Diluted and basic loss per share are the same because the effects of potential issuances of common shares under stock options and warrants would be anti-dilutive.

h) Comprehensive Income

Comprehensive income or loss is the change in net assets arising from transactions and other events and circumstances from non-owner sources, and comprises net income or loss and other comprehensive income or loss. Financial assets that are classified as available for sale will have revaluation gains and losses included in other comprehensive income or loss until the asset is removed from the statement of financial position.

Notes to the Consolidated Financial Statements For the Years Ended November 30, 2014 and 2013

In Canadian Dollars

3. Significant Accounting Policies – Continued

i) Share-based Payments

From time to time, the Company grants stock options to directors, officers, employees and non-employees to purchase common shares. The Company accounts for share-based payments, including stock options, at their fair value on the grant date and recognizes the cost as a compensation expense over the period that the employees become entitled to the award. The fair value of the stock options on the grant date is determined using the Black-Scholes pricing model for stock option awards. The amount recognized as an expense is adjusted to reflect the number of awards for which the related service conditions are expected to be met such that the amount ultimately recognized as an expense is based on the number of awards that do meet the related service conditions at the vesting date. A corresponding increase is recognized in shareholders' equity for these costs.

j) Financial Instruments

The Company accounts for its financial instruments as follows:

Cash and amounts receivable

Loans and receivables

Accounts payable and accrued liabilities Financial liabilities measured at amortized cost

Financial Assets

Financial assets are classified into one of the following categories based on the purpose for which the asset was acquired. Management determines the classification of its financial assets at initial recognition. All transactions related to financial instruments are recorded on a trade date basis. The Company's accounting policy for each category is as follows:

Loans and Receivables

Loans and receivables are non-derivative financial assets with fixed or determinable payments that are not quoted in an active market. They are included in current assets, except for those with maturities of greater than twelve months after the end of the reporting period, which are classified as non-current assets. They are initially recognized at fair value plus transaction costs that are directly attributable to their acquisition or issue and subsequently carried at amortized cost, using the effective interest rate method, less any impairment losses. Amortized cost is calculated by taking into account any discount or premium on acquisition and includes fees that are an integral part of the effective interest rate and transaction costs. Gains and losses are recognized in profit or loss when the loans and receivables are derecognized or impaired, as well as through the amortization process.

Notes to the Consolidated Financial Statements For the Years Ended November 30, 2014 and 2013

i) Financial Instruments - Continued

Financial Assets at Fair Value Through Profit or Loss

An instrument is classified at fair value through profit or loss if it is held for trading. Financial instruments are designated at fair value through profit or loss if the Company manages such investments and makes purchases and sale decisions based on their fair value in accordance with the Company's risk management or investment strategy. Upon initial recognition, attributable transaction costs are recognized in profit or loss when incurred. Financial instruments at fair value through profit or loss are measured at fair value, and changes therein are recognized in profit or loss. The Company has not designated any financial assets as fair value through profit or loss.

Available-for-sale Financial Assets

Available-for-sale financial assets are non-derivative financial assets that are either designated in this category or not classified in any of the other categories. They are included in non-current assets unless the investment matures or management intends to dispose of it within twelve months of the end of the reporting period. Subsequent to initial recognition, available-for-sale financial assets are measured at fair value and changes therein, other than impairment losses and foreign currency differences on available-for-sale equity instruments, are recognized in other comprehensive income and presented within equity in the fair value reserve. When an instrument is derecognized, the cumulative gain or loss in other comprehensive income is transferred to profit or loss. The Company has not designated any financial assets as available-for-sale.

Financial Liabilities

Financial liabilities other than derivative liabilities are recognized initially at fair value and are subsequently stated at amortized cost. Transaction costs on financial assets and liabilities other than those classified at fair value through profit and loss are treated as part of the carrying value of the asset or liability. Transaction costs for assets and liabilities at fair value through profit and loss are expensed as incurred.

Impairment of Financial Assets

The Company assesses at the end of each reporting date whether there are indicators of impairment present for financial assets other than financial assets at fair value through profit and loss. A financial asset is impaired and impairment losses are incurred only if there is objective evidence of impairment as a result of one or more events that occurred after the initial recognition of the asset (a "loss event") and that loss event (or events) has an impact on the estimated future cash flows of the financial asset that can be reliably estimated.

Notes to the Consolidated Financial Statements For the Years Ended November 30, 2014 and 2013

In Canadian Dollars

3. Significant Accounting Policies – Continued

i) Financial Instruments - Continued

Impairment of Financial Assets - Continued

An impairment loss in respect of a financial asset carried at amortized cost is calculated as the difference between its carrying amount and the present value of the estimated future cash flows discounted using the instrument's original effective interest rate. An impairment loss in respect of an available-for-sale financial asset is calculated by reference to its fair value. In the case of equity instruments classified as available-for-sale, a significant or prolonged decline in the fair value of the security below its cost is also evidence that the assets are impaired. If any such evidence exists for available-for-sale financial assets, the cumulative loss, measured as the difference between the acquisition cost and the current fair value, less any impairment loss on that financial asset that was previously recognized in profit or loss, is removed from equity and recognized in profit or loss.

All impairment losses are recognized in profit or loss. Any cumulative loss in respect of an available-for-sale financial asset recognized previously in equity is transferred to profit or loss.

An impairment loss is reversed if the reversal can be related objectively to an event occurring after the impairment loss was recognized.

k) Related Parties

Parties are considered to be related if one party has the ability, directly or indirectly, to control the other party or exercise significant influence over the other party in making financial and operating decisions. Parties are also considered to be related if they are subject to common control. Related parties may be individuals or corporate entities. A transaction is considered to be a related party transaction when there is a transfer of resources or obligations between related parties.

I) Critical Accounting Judgments and Estimates

The preparation of these financial statements requires management to make judgments, estimates and assumptions that affect the application of policies and reported amounts of assets and liabilities, and income and expenses.

Although management uses historical experience and its best knowledge of the amount, events or actions to form the basis for judgments and estimates, actual results may differ from these estimates.

Notes to the Consolidated Financial Statements For the Years Ended November 30, 2014 and 2013

In Canadian Dollars

3. Significant Accounting Policies – Continued

I) Critical Accounting Judgments and Estimates - Continued

The estimates and underlying assumptions are reviewed on an ongoing basis. Revisions to accounting estimates are recognized in the period in which the estimate is revised if the revision affects only that period or in the period of the revision and further periods if the review affects both current and future periods. The most significant accounts that require estimates as the basis for determining the stated amounts include: recoverability and impairment of mineral properties and valuation of share-based payments.

Significant estimates that have the most significant effect on the amounts recognized in the financial statements are as follows:

Recoverability of capitalized mineral property costs

The Company uses the cost model and the value of the mineral property interests is based on expenditures incurred, less any recoveries or impairment. At every reporting period, management assesses the potential impairment which involves assessing whether or not facts and circumstances exist that suggests the carrying amount exceeds the recoverable amount.

Share-based payments

The Company uses the Black-Scholes Option Pricing Model to calculate the fair value stock options and of common share purchase warrants issued. The model requires the input of highly subjective assumptions including the expected price volatility. Changes in the subjective input assumptions can materially affect the fair value estimate, and therefore the existing models do not necessarily provide a reliable single measure of the fair value of the Company's stock options and common share purchase warrants. The assumptions and models used for estimating fair value of stock options and common share purchase warrants are disclosed in Note 5.

Information about critical judgments in applying accounting policies that have the most significant effect of amounts recognized in the consolidated financial statements is included in the following notes:

Note 1 – going concern assessment

Note 3 – functional currency

Note 4 – impairment of exploration and evaluation assets

m) Recent Accounting Pronouncements

The nature and the impact of each standard are described below:

IFRS 10 Consolidated Financial Statements ("IFRS 10") provides a single model to be applied in the control analysis for all investees, including entities that currently are special purpose entities in the scope of SIC 12. In addition, the consolidation procedures are carried forward substantially unmodified from IAS 27 Consolidated and Separate Financial Statements. There was no impact on the Company's financial statements upon adoption of this standard on December 1, 2013.

IFRS 13 Fair Value Measurement ("IFRS 13") converges IFRS and US GAAP on how to measure fair value and the related fair value disclosures. The new standard creates a single source of guidance for fair value measurements, where fair value is required or permitted under IFRS, by not changing how fair value is used but how it is measured. The focus will be on an exit price. IFRS 13 is effective for annual periods beginning on or after January 1, 2013, with early adoption permitted. There was no impact on the Company's financial statements upon adoption of this standard on December 1, 2013.

Recent Accounting Pronouncements not yet applied:

Certain new standards, interpretations and amendments to existing standards have been issued by the IASB or IFRIC that are mandatory for future accounting periods. The Company has not early adopted any of these standards and is currently evaluating the impact, if any, that these standards might have on its financial statements.

IFRS 9 Financial Instruments ("IFRS 9") partially replaces IAS 39 "Financial Instruments: Recognition and Measurement". IFRS 9 uses a single approach to determine whether a financial asset is measured at amortized cost or fair value, replacing the multiple rules in IAS 39. The approach in IFRS 9 is based on how an entity manages its financial instruments in the context of its business model and the contractual cash flow characteristics of the financial assets. The new standard also requires a single impairment method to be used, replacing the multiple impairment methods in IAS 39. IFRS 9 is effective on or after January 1, 2018.

4. Mineral Properties

a) Reef Property, Yukon

The Reef Property is located in the Yukon Territory and is comprised of the following mineral quartz claims:

- i) The Reef I-48 claims, which forms part of the Fireside Properties (Note 4a(i));
- ii) All of the Jay East Property (Note 4a(ii)); and
- iii) The Bloom I-262 claims (staked by the Company).

Notes to the Consolidated Financial Statements For the Years Ended November 30, 2014 and 2013

4. Mineral Properties - Continued

a) Reef Property, Yukon - Continued

(i) Fireside Properties

On April 23, 2013, the Company revised the April 14, 2011 Fireside Agreement with Strategic Metals Ltd ("Strategic"). In the revised agreement, the Company and Strategic agreed to the following terms:

- The Company has fully exercised its option and completed the acquisition of a 100% interest in the Reef, Papua, and Borneo properties in southeast Yukon, subject to a 2% net smelter return ("NSR") to Strategic;
- The Company has terminated the option on 14 remaining Fireside properties, with Strategic retaining its 100% interest in those claims; and
- No further payments or expenditures are required by the Company.

Staking costs of \$71,960 relating to the 14 Fireside properties whose options were terminated were written off during the year ended November 30, 2013.

During the year ended November 30, 2014, the claims relating to the Papua property had expired and therefore staking costs of \$28,622 relating to the Papua property were written off.

(ii) Jay East Property

On August 10, 2013, the Company completed a purchase agreement with Bearing Resources Ltd. ("Bearing") whereby the Company agreed to acquire from Bearing a 100% interest in the Jay East mining claims in the Yukon Territory. In exchange for the 100% interest in the property, Precipitate granted Bearing a 2.0% NSR on the claims, of which one-half of the NSR can be purchased at any time for \$1.0 million. The purchase agreement replaces the July 29, 2011 Jay East Option Agreement whereby the Company had the right to acquire up to 70% of the property.

Notes to the Consolidated Financial Statements For the Years Ended November 30, 2014 and 2013

4. Mineral Properties – Continued

b) Bright and Lombok Properties, Yukon

The Company acquired the Bright and Lombok properties, located in Yukon Territory, through staking. During the year ended November 30, 2013, the claims making up the Lombok property had expired and therefore the staking costs of \$27,300 relating to the Lombok property were written off. During the year ended November 30, 2014, the claims making up the Bright property had expired and therefore the staking costs of \$38,566 relating to the Bright property were written off.

c) Ba, Gemini and Horneline Properties, British Columbia

The Company acquired the Ba, Gemini, and Horneline properties, located in the British Columbia, through staking. During the year ended November 30, 2013, the claims making up the Ba property had expired and therefore the staking costs of \$738 relating to the Ba property were written off. During the year ended November 30, 2014, the claims making up the Horneline property had expired and therefore the staking costs of \$993 relating to the Horneline property were written off.

d) Juan de Hererra Property, Dominican Republic

On November 9, 2012, the Company acquired 100% ownership of the shares of 0945044 BC Ltd., a private BC registered company ("BC Corp.") which owns a 100% interest in the Juan de Hererra and Los Pinalitos (previously Hato Nuevo) concessions ("Juan de Hererra property") in the Dominican Republic through Corporacion Minera San Juan, S.R.L. ("CMSJ"), its wholly-owned subsidiary. The agreement was amended on October 9, 2013 whereby all the cash payments and share payment obligations will be deferred by 12 months. The Company paid \$60,000 to acquire the shares of BC Corp. from certain shareholders of the Company.

Notes to the Consolidated Financial Statements For the Years Ended November 30, 2014 and 2013

In Canadian Dollars

4. Mineral Properties - Continued

d) Juan de Hererra Property, Dominican Republic - Continued

In order for the Company to maintain its right, title and interest in BC Corp., the Company must complete the following cash payments, exploration expenditures and share issuances:

- Cash payments totalling \$390,000 as follows:
 - \$90,000 on or before January 12, 2015 (paid subsequent to year end)
 - \$150,000 on or before January 7, 2016; and
 - \$150,000 on or before January 7, 2017;
- Incur exploration expenditures totalling \$1,000,000 as follows:
 - \$250,000 on or before January 7, 2015 (incurred);
 - \$300,000 on or before January 7, 2016 (incurred); and
 - \$450,000 on or before January 7, 2017 (incurred);
- Issue a total of 3,000,000 common shares of the Company as follows:
 - 1,000,000 common shares on or before January 12, 2015 (issued subsequent to year end);
 - 1,000,000 common shares on or before January 7, 2016; and
 - 1,000,000 common shares on or before January 7, 2017;

The properties are subject to a 3% NSR from any base and precious metal commercial production. The Company may acquire 50% of the NSR by paying \$2,000,000 to the stakeholders of BC Corp.

On January 7, 2014, the Company's application for the exploration concessions over the Juan de Herrera Property was accepted by the Dominican Republic Ministry.

Notes to the Consolidated Financial Statements For the Years Ended November 30, 2014 and 2013

4. Mineral Properties – Continued

e) David and Richard Properties, Dominican Republic

On June 30, 2014, the Company, through CMSJ, entered into a property purchase and sale agreement with Gexplo S.R.L. and Santo Mining Corp. (the "Sellers") whereby the Sellers will sell, transfer and assign all their right, title and interest in and to the applications to the David and Richard properties, located in the Dominican Republic. The Sellers retain a 2.0% NSR on any future production from the David and Richard properties. On July 15, 2014, to complete the acquisition, 100,000 share purchase warrants in the capital of the Company were transferred to the Sellers. Each warrant can be exercised for one common share of the Company at \$0.30 per share until October 15, 2014. The fair value of the warrants, calculated by using the Black-Scholes method, was determined to be \$1,303 and was recorded to mineral property interest (see note 5c)).

f) Cecilia Property, Mexico

On February 19, 2013, the Company signed an option agreement with Gunpoint Exploration Ltd. ("Gunpoint") whereby the Company has the right to acquire a 100% interest in the Cecilia gold-silver project in Sonora state, Mexico.

Under the terms of the agreement, which was amended on June 24, 2013, the Company can elect to complete the acquisition by making the following cash payments and issuing the following common shares to Gunpoint:

- 58,000 common shares of the Company at the completion of due diligence on October 24, 2013 (issued at a value of \$5,800);
- \$125,000 and 233,000 common shares on or before October 24, 2014; and
- \$275,000 and 234,000 common shares on or before October 24, 2015.

A portion of the property is subject to a 1% NSR payable to the Mexican Government.

Based on results generated from the work carried by the Company during the term of the Cecilia property, the Company has decided to not to pursue the acquisition of the property and complete the remaining option payments due on October 24, 2014 and October 24, 2015. The Company has given Gunpoint written notice of termination of the option agreement. Therefore, acquisition costs relating to the Cecilia project of \$5,800 were written off as at November 30, 2014.

5. Shareholders' Equity

a) Authorized

Unlimited number of common shares without par value

b) Issued Share Capital

Share transactions for the year ended November 30, 2014:

(i) On May 26, 2014, the Company completed a non-brokered private placement of 6,953,333 units at a price of \$0.15 per unit for gross proceeds of \$1,043,000. Each unit consists of one common share and one warrant. Each warrant entitles the holder to purchase one additional common share at a price of \$0.25 per share for a period of 12 months from May 26, 2014. The Company has the right to accelerate the expiry date of the warrants if the daily volume weighted average trading price of the common shares of the Company is equal to or exceeds \$0.50 for a period of 10 consecutive trading days, commencing four months after the date the warrants are issued.

Gross proceeds from this financing were allocated \$769,000 to share capital and \$274,000 to warrant reserves based on their relative fair values. The Company paid \$12,692 of share issue costs related to the private placement which was offset against share capital.

(ii) On November 25, 2014, the Company completed a non-brokered private placement of 2,235,500 units at a price of \$0.13 per unit for gross proceeds of \$290,615. Each unit consists of one common share and one warrant. The Company issued 80,130 warrants as finder's fee. Each warrant entitles the holder to purchase one additional common share at a price of \$0.25 per until November 25, 2017. The Company has the right to accelerate the expiry date of the warrants if the daily volume weighted average trading price of the common shares of the Company is equal to or exceeds \$0.50 for a period of 10 consecutive trading days, commencing four months after the date the warrants are issued.

Gross proceeds from this financing were allocated \$172,000 to share capital and \$118,615 to warrant reserves based on their relative fair values. The Company paid \$12,783 of share issue costs related to the private placement which was offset against share capital. The fair value of the warrants was determined to be \$8,300 using the Black-Scholes pricing model (see note 5d)) and was offset against share capital.

b) Issued Share Capital - Continued

Share transactions for the year ended November 30, 2013:

(iii) On May 16, 2013, the Company completed a non-brokered private placement of 3,333,332 units at a price of \$0.15 per unit for gross proceeds of \$500,000. Each unit consists of one common share and one warrant. Each warrant entitles the holder to purchase one additional common share at a price of \$0.25 per share for a period of 24 months from May 16, 2013. The Company has the right to accelerate the expiry date of the warrants if the daily volume weighted average trading price of the common shares of the Company is equal to or exceeds \$0.50 for a period of 10 consecutive trading days, commencing four months after the date the warrants are issued.

Gross proceeds from this financing were allocated \$318,000 to share capital and \$182,000 to warrant reserves based on their relative fair values. The Company paid \$1,722 of share issue costs related to the private placement which was offset against share capital.

(iv) On October 24, 2013, the Company issued 58,000 common shares in connection with the option agreement with Gunpoint (Note 4 (e)) at a value of \$0.10 per common share for total of \$5,800.

c) Warrants

Details of warrant activity for the years ended November 30, 2014 and 2013 are as follows:

d) Warrants - Continued

The following weighted average assumptions were used for the Black-Scholes option pricing model valuation of warrants issued in the year ended November 30, 2014:

Risk-free interest rate	1.06%
Expected life of options	1.49 years
Expected annualized volatility	122%
Expected dividend rate	0%

e) Share Options

The Company has a rolling share option plan, which authorizes the Board of Directors to grant options to directors, officers, employees and consultants to acquire up to 10% of the issued and outstanding common shares of the Company. Under the plan, the exercise price of each option may not be less than market price of the Company's shares calculated on the date of the grant less the applicable discount. The options can be granted for a maximum term of 10 years. The Company's share option plan contains no vesting requirements, but permits the Board of Directors to specify a vesting schedule at its discretion.

Details of activity in share purchase options for years ended November 30, 2014 and 2013 are as follows:

November				November 30,	Exercise	
31, 2013	Issued	Cancelled	Expired	2014	Price	Expiry Date

Notes to the Consolidated Financial Statements For the Years Ended November 30, 2014 and 2013

In Canadian Dollars

5. Shareholders' Equity - Continued

d) Share Options

During fiscal 2014, the Company granted to its directors, officers and consultants 510,000 (2013 - 400,000) share options with a fair value of \$66,662 (2013 - \$59,125) or \$0.13 (2013 - \$0.15) per option.

The following assumptions were used for the Black-Scholes valuation of stock options:

	2014	2013
Stock price volatility	120%	115%
Risk-free interest rate	1.43%	1.24%
Expected life of options	5 years	4.25 years
Expected dividend yield	0.00%	0.00%

During fiscal 2014, the Company recorded share-based compensation of \$60,513 (2013 - \$207,032) for options that vested during the year.

e) Escrow Shares

Pursuant to an escrow agreement dated February 1, 2012, 2,665,000 common shares were placed in escrow. 10% of the escrowed shares (266,500 shares) were released from escrow upon completion of the IPO on May 24, 2012, and 15% of the shares are released from escrow every 6 months thereafter. As of November 30, 2014, there were 399,750 common shares remaining in escrow.

Pursuant to an escrow agreement dated May 24, 2012, 3,846,367 Strategic Shares were placed in escrow ("Strategic Escrowed Shares"). 10% of the Strategic Escrowed Shares (384,637 shares) were released from escrow upon completion of the IPO, and 15% of the shares are released from escrow every 6 months thereafter. As of November 30, 2014, there were 576,955 Strategic Shares remaining in escrow.

6. Segmented Information

a) Operating Segment

The Company's operations are primarily directed towards the acquisition of mineral properties and exploration for metals in Canada and the Dominican Republic.

9. Capital Management

The Company manages its capital to maintain its ability to continue as a going concern and to provide returns to shareholders and benefits to other stakeholders. The capital structure of the Company consists of equity comprised of issued share capital, reserves and deficit.

The Company manages its capital structure and makes adjustments to it in light of economic conditions. The Company, upon approval from its Board of Directors, will balance its overall capital structure through new share issues or by undertaking other activities as considered appropriate under the specific circumstances.

The Company is not subject to externally imposed capital requirements.

10. Financial Instruments

a) Fair Values

The Company has classified fair value measurements of its financial instruments using a fair value hierarchy that reflects the significance of inputs used in making the measurements as follows:

Level 1: Valuation based on quoted prices (unadjusted) in active markets for identical assets or liabilities:

Level 2: Valuations based on directly or indirectly observable inputs in active markets for similar assets or liabilities, other than Level 1 prices, such as quoted interest or currency exchange rates; and

Level 3: Valuations based on significant inputs that are not derived from observable market data, such as discounted cash flow methodologies based on internal cash flow forecasts.

The fair value of cash, amounts receivable, and accounts payables and accrued liabilities approximates their carrying value due to their short-term maturity. Cash is measured using level one of the fair value hierarchy.

b) Liquidity Risk

Liquidity risk is the risk that the Company will not be able to meet its financial obligations as they fall due. The Company currently settles its financial obligations out of cash. The ability to do this relies on the Company raising equity financing in a timely manner and by maintaining sufficient cash in excess of anticipated needs. The Company's financial obligations are limited to accounts payable and accrued liabilities, all of which have contractual maturities of less than a year.

c) Credit Risk

Credit risk is the risk of financial loss to the Company if a customer or counterparty to a financial instrument fails to meet its contractual obligations. Financial instruments that potentially subject the Company to a concentration of credit risk consist primarily of cash and

amounts receivable. Cash is held with a major Canadian financial institution and the receivables are from Government entities. Management is of the view that all amounts are fully collectible.

Precipitate Gold Corp.

10. Financial Instruments - Continued

d) Interest Rate Risk

Interest rate risk is the risk that the fair value or future cash flows of a financial instrument will fluctuate because of changes in market interest rates. The Company has no interest-bearing debt. The Company's sensitivity to interest rates is minimal.

e) Political Risk

The Company has subsidiaries in the Dominican Republic, the United States and Mexico. These operations are potentially subject to a number of political, economic and other risks that may affect the Company's future operations and financial position.

f) Foreign Currency Fluctuation Risk

The Company has vendors in Canada, the United States, the Dominican Republic and Mexico; therefore, the Company's operations are affected by the currency fluctuations in these jurisdictions. The Company's exposure to foreign currency fluctuations is minimal.

11. Subsequent Event

On December 30, 2014, the Dominican Republic government cancelled the David and Richard properties' concession applications (Note 4e)). Immediately afterward, in early January 2015, the Company, via its wholly owned Dominican subsidiary, Precipitate Dominicana S.R.L., re-applied for mineral rights for the same two areas.
