## Precipitate Identifies Numerous New Base Metal Soil Anomalies at Juan de Herrera Project, Dominican Republic

*Vancouver, B.C. – February 13, 2018* - **Precipitate Gold Corp.** (the “Company” or “Precipitate”) (TSXV: PRG) is pleased to announce regionally compiled results of its near property-wide soil sampling program conducted on its 100% owned **Juan de Herrera project** in the Dominican Republic.

The combination of previously collected soil sampling analyses with recent XRF (X-ray fluorescence) scanning data from a nearly property-wide regional scale survey has identified numerous new and very extensive base metal anomalies (copper, lead and zinc) on the Company’s Juan de Herrera property. The Southeast and Peak-Melchor areas host some of the more significant new base-metal-in-soil anomalies, being kilometre-scale in size and open along strike in at least one direction. These and other new zones will require follow up soil sampling programs to better define the full extent of their surface expressions and assist in vectoring drill targets to identify the source of mineralization.

The soil anomalies shown on the [accompanying map](#) emphasise the dominant northwest-southeast regional stratigraphic and mineralized trends and demonstrate the extraordinary relative size and tenor of these new anomalies in comparison to others within the regional Tireo Gold Camp. See the accompanying map or [Company’s website](#) for the regional-scale soil sample figure.

Jeffrey Wilson, Precipitate’s President and CEO commented, “We’re pleased with these latest results from our extensive soil sampling survey as they once again support, and in fact expand the project’s potential to host multiple mineralized zones warranting detailed follow up and future drill testing. Identification of these base-metal-in-soil anomalies is an effective and efficient vectoring tool for identifying prospective VMS (volcanogenic massive sulphide) and epithermal styles of mineralization in the Tireo Gold Camp, as almost all significant mineralized zones within the Camp have an obvious soil anomaly signature.”

XRF soil samples were collected at a density of 25 metres by 50 metres, with over 17,000 individual soil samples collected and over 14,000 samples analyzed with a portable XRF device. Portable XRF instruments collect quality base metal and various pathfinder element data but provide limited precious metal results. All soil samples from this phase of exploration have been placed in secure storage for future work, which may include laboratory analyses, geological review or clay/alteration studies. Prior laboratory soil samples collected by Precipitate and GoldQuest Mining Corp. were collected on a wide range of densities (up to a detailed 25m x 50m) and were submitted to Bureau Veritas (“BV”) for multi-element ICP-MS analysis. Comprehensive data evaluation is ongoing and individual zone-specific detailed compilation interpretations and illustrations are anticipated in the near future.

This news release has been reviewed by Michael Moore P. Geo., Vice President, Exploration of Precipitate Gold Corporation, the Qualified Person for the technical information in this news release under NI 43-101 standards.

**About Precipitate Gold:**

Precipitate Gold Corp. is a mineral exploration company focused on exploring and advancing its mineral property interests in the Tiroo Gold Trend of the Dominican Republic. The Company also maintains assets in British Columbia and southeast Yukon Territory, including the Company's Reef property located immediately adjacent to Golden Predator's 3 Aces Project in the Upper Hyland River area. The Company has entered into an Option to Purchase Agreement with Golden Predator, whereby Golden Predator can earn a 100% interest in the Reef claims by making certain staged payments in cash and shares and warrants. Precipitate is also actively evaluating additional high-impact property acquisitions with the potential to expand the Company's portfolio and increase shareholder value.

Additional information can be viewed at the Company's website [www.precipitategold.com](http://www.precipitategold.com).

**On Behalf of the Board of Directors of Precipitate Gold Corp.,**

"Jeffrey Wilson"

President & CEO
