

Precipitate Contracts Former Pueblo Viejo Chief Geologist and Completes Ground Preparations in Advance of Drilling at Pueblo Grande Project, Dominican Republic

Vancouver, B.C. – December 17, 2019 - Precipitate Gold Corp. (“Precipitate” or the “Company”) (TSXV: PRG) is pleased to announce it has engaged Darren O’Brien P.Geol. to provide a project geology review and assist with the selection of drill collar locations and orientations within the Company’s Loma Cuaba Lithocap Zone of its Pueblo Grande Project adjacent to Barrick’s Pueblo Viejo gold-silver mine. Mr. O’Brien was the Pueblo Viejo Chief Geologist (2002-2006) for Placer Dome (now Barrick) at the time the positive production decision was made. In addition, Company field crews have completed clearing and repairs to the area’s main access roads, while establishment of the necessary pathways and drill site preparations in advance of drilling is ongoing. See [accompanying photos](#) of field crews conducting ground preparations and prospecting, or visit the Company’s website at www.precipitategold.com.

Precipitate's ground team, led by Vice President, Exploration, Michael Moore, P. Geo., consists of Darren O'Brien and two additional Canadian geologists with extensive Dominican Republic exploration experience. In addition, a 14 man crew of locally-sourced field helpers and managers are clearing access routes and conducting final field preparations in advance of the commencement of the upcoming diamond drill program.

Jeffrey Wilson, President & CEO, stated, "We are pleased to be nearing commencement of this highly anticipated drill program. The addition of Darren O'Brien, a former Placer Dome geologist, during this critical stage of target refinement, heightens our team's knowledge and understanding of the local geological environments that will be tested in the upcoming drill program. Access to this level of expertise in this stage of preparation is a vital tool in finalizing the drill plan."

Subsequent to the completion of the Loma Cuaba Lithocap Zone drill program preparations, the technical team will visit other prospective but underexplored zones within the broader Pueblo Grande property package to conduct mapping and sampling surveys to identify and prioritize additional areas that could emerge as future targets for exploration.

This news release has been reviewed by Michael Moore P. Geo., Vice President, Exploration of Precipitate Gold Corporation, the Qualified Person for the technical information in this news release under NI 43-101 standards.

About Precipitate Gold:

Precipitate Gold Corp. is a mineral exploration company focused on exploring and advancing its mineral property interests in the Pueblo Viejo Mining Camp and Tiroo Gold Trend of the Dominican Republic. Precipitate is also actively evaluating additional high-impact property acquisitions with the potential to expand the Company's portfolio and increase shareholder value.
